Multi-Function Dashboard Provides Better User Experience

Integrated with NFC, cellphone holder and wireless charging (optional). The vertical cellphone holder fits most mainstream cellphones on the market, and available wireless charging adds more ease and convenience.

- 13.56Mhz, supports ISO14443A/B protocol
- Work in tag mode or reader mode

GEN-3 IoT Improves Performance Significantly

The high precise positioning can be achieved in urban canyon,
underground passages and even tunnels

GEN-3 IoT

- **Highly precise positioning,**

which leverages dual-band GNSS, ADR and multi-constellation technology to greatly improve connectivity and positioning, even in urban canyons, underground passages and tunnels.

- **Onboard geofencing**

Stores geofence data onboard Responds within 0.6S

- **High-quality, multi-language audio**

Including dynamic volume range, large-capacity audio storage, audio OTA and high-quality speakers for a premium experience.

- **Flexible interface design**

Reserved interface for additional peripheral sensor

The dual interfaces design of Uart and Can Bus, is suitable for vehicles with different communication systems

- **Optional Wi-Fi auxiliary positioning**

To improve outdoor, sheltered space and semi-sheltered space accuracy

- **Bluetooth 5.1**

To further boost speed and maintenance efficiency.

- **New anti-theft design**

IPX7 waterproofing, a small footprint and luminous stickers for night visibility

- **Longer standby time**

With an additional 1000mah backup batter and up to 100 working hours

Tube-side Atmosphere Light Makes scooter more visible anytime anywhere*

Color and lightening mode are customizable, eg. flash when brake.

* Optional

Dual Suspension System*

Added with rear suspension, the dual suspension system could provide a smoother ride over rough road conditions.

*Optional, vehicle frame will be different in rear suspension version

12-inch Front Wheel & PU Filled Rubber Tire Balance Comfort And Maintenance-free

12-inch wheel diameter, better comfort performance

PU filled rubber tire, promoted comfortableness , maintenance-free design
and cost-effective.

More Powerful Motor Boosts Gradeability

Rated power: 400W

Front And Rear Turn Light Makes Riding Safer

Full-covered Rear Fender & Three-in-one Rear Light

Easily pass through mud pits and keep users clean

Charging Docking Station* **—Integrated With Duckt**

Parking station & Charging station

Output Power: 120W

Efficiency: 99%

* Optional
